ABOUT THE PROGRAM

- Learn to design, simulate, and scientifically evaluate complex restorative treatments, integrating the latest materials, digital workflows, and team-based therapeutic approaches.
- Explore cutting-edge topics including oral-systemic health, aging and prevention, occlusion and function, inflammation, and autoimmunity.
- Complementary Hands-On training ensures both precision and patient safety, preparing you to manage complex cases with confidence.

ADMISSION REQUIREMENTS

- Academic University Degree in Dentistry, or Bachelor's Degree for Dental Technicians / "Zahntechnikermeister"
- Valid License to Practice Dentistry (for Dentists)
- 2 Years of Professional Experience Recommended
- Proof of English Proficiency at a Minimum B2 Level (e.g., TOEFL, IELTS, or equivalent)
- Two Letters of Recommendation from a Professor, Mentor, or Employer
